

# Hybrid IT Practice Builder

## The Cisco Partner Journey to Cloud

Increasing Cloud Capability  
in the Channel

- Part of IT Channel Company
- 150 fte's, € 50 mio revenue
- **Business Transformation ICT companies**
- Workshops, Training & Portal
  - Academies & training programs
  - Channel training & certification programs
- Cisco:
  - Business Learning Partner
  - Hybrid IT Practice Builder Program EMEAR(CMSPEP)
  - Cloud Readiness training PAM's Europe

<http://www.conceptsales.eu>

<http://www.hybriditpracticebuilder.com>

Should Cisco Partners:

- Be compliant with Cisco requirements?
  - Gold partners:
    - 4 Hybrid IT services(Cisco Cloud/Powered)
    - 1 Business Value Practitioner(3 roles Business Value Practitioner, Specialist and Analyst)
  - CMSP certification

Or.....

- See and pursue the huge opportunity of Cloud & Managed services and take the **strategic** decision to become successful in this market?

Answer: It should be both!

Cisco partners are concerned about:

1. Profitable revenue growth
2. Transforming their businesses
3. What do they sell today?
4. What should their role be in Cisco Intercloud
5. How does digitization affect them today

HybridIT Practice Builder covers issues 1 to 5!!

## Business Workshop

Management consult to review strategy and accelerate decision making and execution

1:1

2-day in-house

## Self-consultancy

Examples, best-practices, templates and self consulting tracks

Portal access

## Sales Training

Skill training to develop individuals and anchor change

In-company

2-day in-house

**Main issues**

Sense of urgency to change

“Old School” management

Lack of experience in building business

Impact unknown

No clear business plan and GTM strategy

**Main issues**

No compelling value proposition

Own offering and/or resell

How to differentiate the proposition

What to do with traditional portfolio

**Main issues**

Marketing should be responsible for lead generation

Number of qualified leads is low

Wrong marketing tools(push/pull)

Websites don't meet today's requirements

New buying cycle

**Main issues**

Budget shift from IT to LOB management

Shift to business outcome sales

C-level sales required

New sales cycle

Lack of sales process and tools

**Main issues**

Quality issues

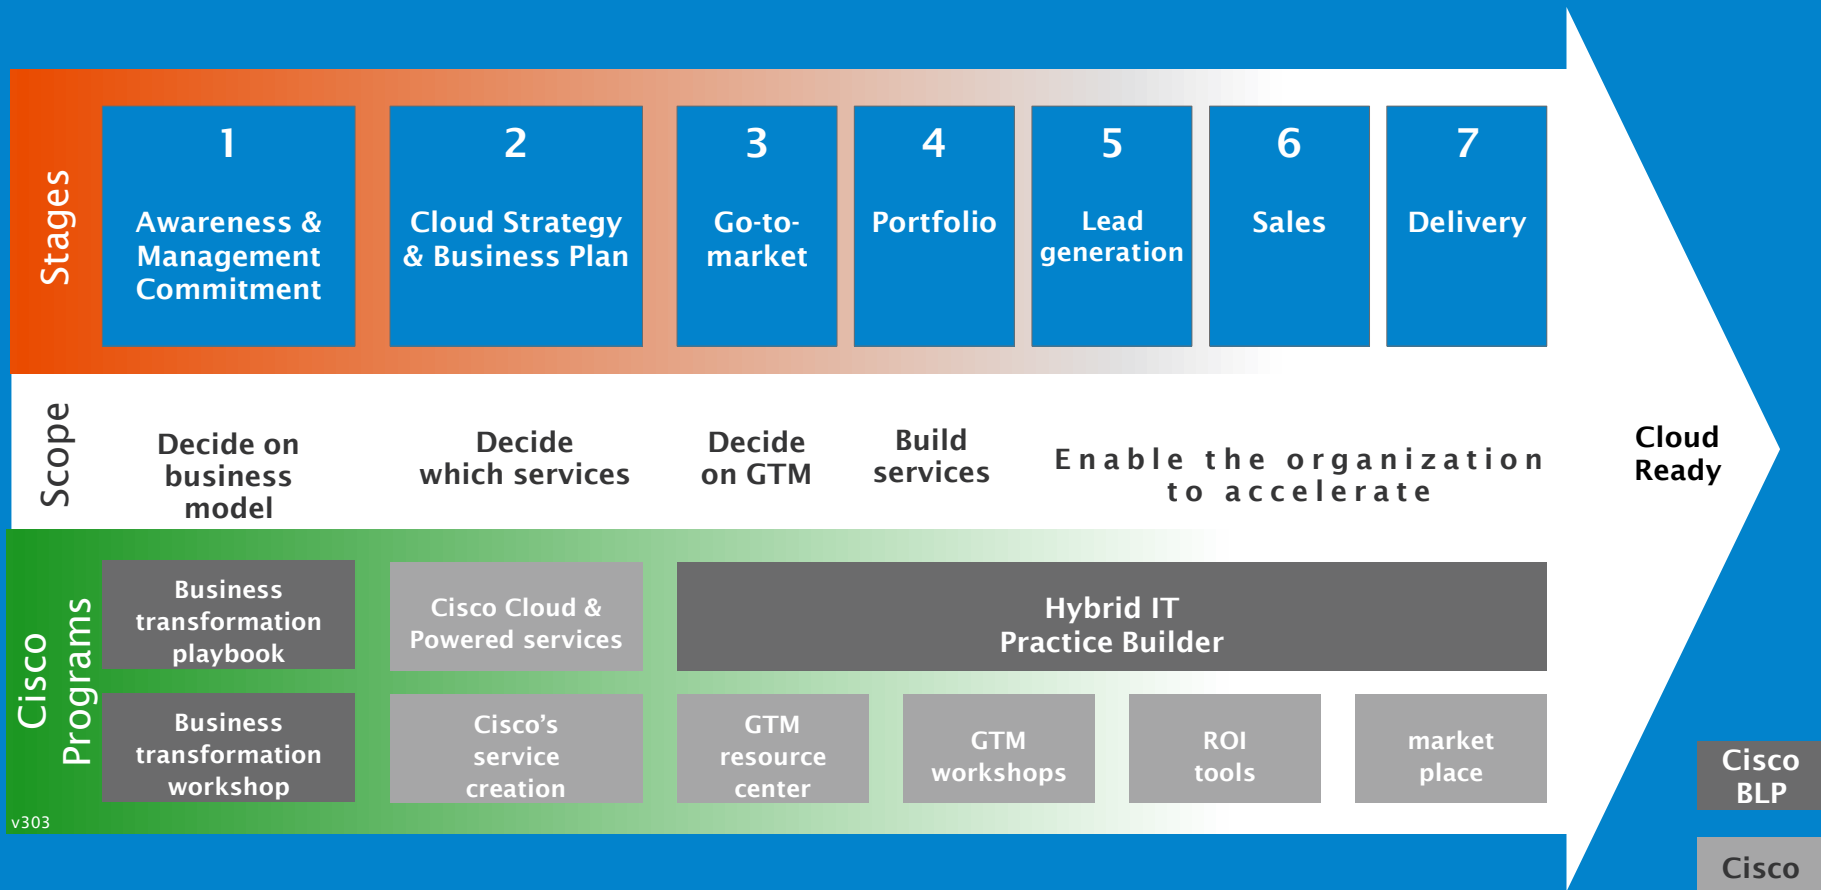

Poor customer satisfaction

Poor efficiency

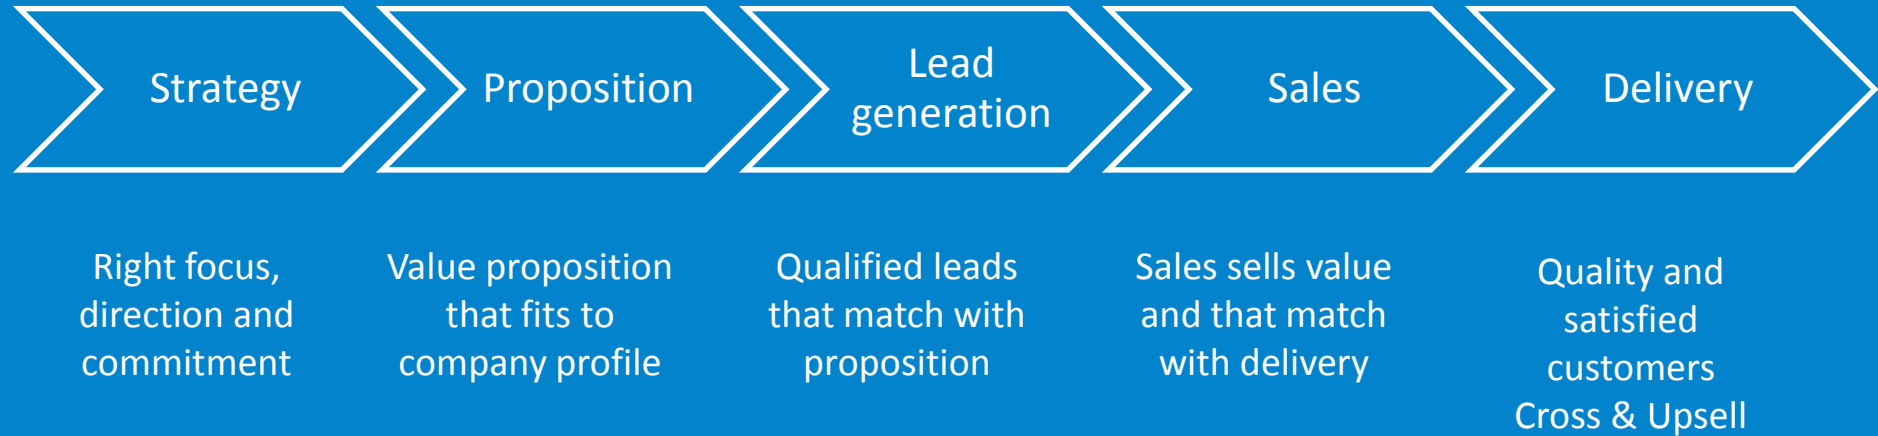

Non standard solutions

Shift from re-active services to pro-active services

**Business****Portfolio****Marketing****Sales****Delivery**

# Chain of success

Integral approach

- Update management on the Cloud Market trends, Cloud market opportunity and TAM
- Advise on and help management transform their traditional business model to a Cloud business model.(recurring)
- To get a clear understanding of the impact and organizational consequences of the Cloud Business transformation
- Align different stakeholders in business transformation process
- Optimize partner's (sales)performance throughout their organization
- Discuss partner's issues and find solutions to solve these
- Reduce go-to-market time of new HybridIT portfolio
- Accelerate CMSP certification
- Define action plan

## Service providers

- Experienced in cloud business model
- Less experienced in IT
- Less experienced in higher value add

## System integrators/VAR's

- Cloud is new business model
- Experienced in IT
- Less experienced in higher value add

## MSP's/CSP's

- (very) experienced in Cloud business
- Experienced in IT
- Less experienced in GTM strategy, building business & business outcome

## TRANSFORM

Cloud Provider/Reseller/Aggregator

Delivering flexible IT on recurring basis  
Cisco Cloud/Powered Services

## Business Workshop

Management consult to review strategy and accelerate decision making and execution

2-day in-house

## Self-consultancy

Examples, best-practices, templates and self consulting tracks

Portal access

## Sales Training

Skill training to develop individuals and anchor change

2-day in-house

Quote tools

**CISCO**

"stress-free state-of-the-art communications"

Managed Unified Communications [hosted]

What is Unified Communications?

Integration of telephony, data and applications

Traditional vs. Unified Communications

The hosted proposition

Managed Services content

Presentations

Annex: SLA

SLA: Managed Unified Communications [hosted]

The starting point for our service is to help clients as quickly as possible. If several requests arrive simultaneously we shall have to settle them sequentially and depending on the priority. As a result certain service levels exist with the KPIs. In practice the service will usually be 'direct'.

**Service window**

The management work and resolution of incidents are executed within the service window.

Service component	Days	Times
Monitoring (automated)	Sunday - Saturday	00.00 - 23.59
Proactive management	Monday - Friday	08.30 - 17.30
Management requests	Monday - Friday	08.30 - 17.30
Service desk	Monday - Friday	08.30 - 17.30
Reporting period	Quarterly	08.30 - 17.30

The automated monitoring is completely continuous. Monitoring takes place within the service window for service requests, unless standby agreements are made for this. If agreed and submitted certain critical messages are sent to the customer's contact person by e-mail or SMS.

**KPI-MUCop-01 - Service desk reaction time**

Description:	Service: By telephone
Service level:	> 90%
Description:	Acceptance of reports and requests Classification of calls Administration of calls Routing calls
Scope:	Only relates to components which are managed within the service.
